

H.R. 1976 MEDICARE FOR ALL (Single Payer) ACT of 2021

Benefits patients, doctors, and taxpayers alike, instead of profit-driven insurance and pharmaceutical companies.

- **UNIVERSAL COVERAGE:** Includes everyone living in the U.S. Eliminates financial barriers to care. No more networks.
- **FREEDOM OF CHOICE:** Choose your providers, not your insurance plan. Pay for health CARE, not health INSURANCE!
- **COST EFFECTIVE:** Removes corporate middlemen from the equation. Decreases administrative expenses by eliminating high executive salaries and corporate profits. Streamlines billing. Negotiates fair prices for pharmaceuticals and healthcare services. Ensures that private profit never comes before public health.
- **COMPREHENSIVE:** Covers ALL medically-necessary care: inpatient and outpatient services, prescriptions, reproductive health, dental, vision, mental health, and more. Addresses affordability, accessibility, sustainability, accountability, and transparency!
